

CV Power supplies 24V with PC

Areas of application

- Suitable for luminaires of protection classes I and II
- Hospitality – decorative lighting, night light
- Restaurants – decorative lighting
- Shops – decorative lighting, shelf lighting
- Residential – cove lighting, under cabinet lighting

Product family benefits

- IP rating: IP20
- High efficiency
- Very stable output power
- High electrical reversible short-circuit, overload, overtemperature protection
- Independent installation possible

Product family features

- 24 V constant output voltage
- SELV
- Wide Ta range -20 – +50 °C
- Lifetime 50 000 h at tc max
- Dimming range: 3...100 % luminous flux
- Recommended to Use Trailing Edge dimmer

Ecodesign regulation information:

Intended for use with LED modules.
The forward voltage of the LED light source shall be within the defined operating window of the control gear in all operating conditions including dimming if applicable.

Separate control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK. For this purpose, collection points for recycling centres and take-back systems (CRSO) are available from retailers or private disposal companies, which accept separate control gear and light sources free of charge. In this way, raw materials are conserved and materials are recycled.
